A Theory About

The Hidden Workings of mRNA/DNA Vaccines

I met a fully-vaccinated man who was happy & proud of it. But I was gobsmacked when he reported to hear voices and feel strange signals near cell-phone towers since the jabs. One would usually aim such phantasies at the rubbish bin as conspiracy-theory talk, but this guy was no high-thinking conspiracy theorist at all, just an honest Kiwi.

As an electronic engineer I am suspicious about vaccines being ferro-magnetic, or reacting to high-frequency electro-magnetic radiation. But if they contain finest ("nano") ferro-magnetic powder/molecule clusters in suspension, they may make blood vessels slightly more reactive to such radiation, absorbing some as low-quality aerials. Although there is **absolute** no chance of the complex fully-digital data signals being decoded by living tissue into voices, electro-magnetic-radiation stress on nerves could possibly cause the brain to react dream-like with voice imaginations – your brain is more intelligent than you think… Psychologists would love it. But these signals are supposed to be so weak and safe that they should not noticeably affect anybody. Well, they did not test this with such material suspended in the blood. But why would they put these "impurities" into the vaccines?

Magnetofection uses superparamagnetic (possibly poisonous) "nano"particles in biotechnology incl. drug and vaccine delivery, but firms may want to guard patents' secrets of such billion-$ vaccines. Ferro-magnetic particle clusters are used to infect cells with RNA/DNA through applying magnetic force. High-frequency electro-magnetic radiation may thus grind/vibrate these particles through the cell membranes. It would indeed be ingenious to design mRNA/DNA vaccination with the expectation that day-to-day cell-phone use would slowly force the genetic-material load into cells, but why not telling this? It would also be ingenious to enforce gene"therapy" on the whole population via so-called vaccines, while such particles are brushed-off as process contamination (which they do). Malice can also be ingenious, (but is always ultimately self-defeating).

As these particles do not decompose, they would remain in the body for a considerable time, and would be ground recklessly through the body even after having deposited their mRNA/DNA load. Long-term heart inflammation and death through this process will be explained by natural ageing after the 2-year "long"-term test period, as will murder using targeted high-frequency senders – The filthy-rich's antidote to overpopulation and political opponents to their hidden dictatorship, all in yours the General Public's interest... A welcomed side effect could be the long-term reduction of the ability to think deeply, which goes well with a serf class so desired by the ultra-rich; I better stop here to avoid the rubbish bin. Suddenly compulsory vaccination makes so much more sense…
The inherently malicious gain-of-function corona-virus research in the China Wuhan laboratory owned by GlaxoSmithKline (owning Pfizer) glows now in a different colour – Apparently not by virus transmissions **!**

Besides, if cell-phone towers also radiated high-frequency signals modulated with analogue voice signals, amalgam tooth fillings could become low-quality de-modulating diodes making them hearable; This had been observed already at the beginnings of radio transmission many decades ago.

Long-Term "Side"Effects & the Next Vaccines – Populistic Acceptance Preparation

The established German newspaper "Süddeutsche Zeitung" reports that The Lancet Public Health predicts a worldwide tripling of **Dementia** cases (in Germany by 65%) in 3 decades, and that last year WHO predicted a fast increase within the next 10 years, as a result of population ageing and growth. [One should consider Germany's vax rate of 65% – and its (also Japan's) population's steady but slow decline for decades so that the absolute number should remain rather constant.] The Lancet writes that from a public-health-perspective these findings were generally disappointing, because they apocalyptically suggest an unstoppable increase; Thus it were even more important to inform about every way that could delay or avoid this… University of Washington also forecast a reduction in birth rates **–** *how could they*?...

What unnamed agent then could possibly and predictably cause this increase **/** reduction? Well, there is one Dementia-MS **/** infertility agent with a recent drastic increase of application: Genetic mRNA vaccines using cell-phone magnetofection — Covid kill shots with superparamagnetic nanoparticles vibrating through all soft tissue, incl. brain cells, each with 10,000 ultra-thin connections to other neurons. The mRNA spike protein could also injure neurons with such results, but not officially...

Later the established German newspaper "Die Zeit" (also "Der Spiegel" and "Süddeutsche Zeitung") reported that a virus is the likely cause of **Multiple Sclerosis** (**MS**), showing a corona-virus-like picture. It wrote that the overwhelming majority has this virus and/or antibodies, leading to the not-yet-proven assumption that it is at least necessary for developing MS, almost implying a future increase in MS cases (like dementia cases above).

If this virus is of naturally-distributed origin, then it can hardly be the cause, only a supporting factor. If not, the Dementia **/** MS agent again could have spread this disease via above method.

Solution: Vaccination against Dementia / MS (according to an MS-sufferer MS is **re-branded Polio** that had been "eliminated" via childhood vaccinations…). Thus "Der Spiegel" already comments under "The Tragic Future Of Anti-vaxxers" that mRNA "vaccines" were our future, also for MS **!** Fake-news propaganda later reached new heights, proclaiming that you could **take 217 Covid shots** without any negative results (he knew before anyone else that jabs don't stop infection **/** transmission, so why having weekly boosters for years – from Bill Gates & Co's private clinics? … A serious mental case!).

Yeah right, suddenly corona viruses are everywhere these times. Children now need to be "vaccinated", too, so that the serious "side"effects outnumber any (corona) virus disease effects**:** Covid vaccines were not made for corona viruses, but **real and/or virtual corona viruses were made for the vaccine**(s)... Criminal fascists and their oh-so-benign corona monarchs (incl. British royals) with their sociopathic retardation will shine superior rulers by birth after having damaged your neurons. – They'd still call it democracy, though… Got the picture?

3rd-World War ?

Fritz Fehling, 15/9/2022

Africa & India largely resisted costly vaccinations without many complications, and threatened in this way to reveal vaccine 'side'effects in statistical comparison with vaccinated minorities :

SouthAfrica's racial divisions showed also in vaccination rates and cell-phone coverage (necessary for GHz magnetofection) – so Omicron was 'discovered'(defined) as a diversion, which then also solved the highly-vaxxed-NZ problem, where establishment of previous α-β-δ Covid variants could not be propaga(nda)ted because of successful "elimination" strategy. In India one state had a much higher vaccination rate due to Bill Gates' philanthropic kill-shot propaganda, while others used anti-parasite drug Ivermectin as prevention and symptom reduction. Thus again Delta was 'discovered'(defined).

What to do with overpopulated 3rdworld, how to get a Covid vax-cull established? Just some lateral thinking & planning when introducing the proven Covid method: These countries suffer from Malaria parasite disease, so ('non-viral'mRNA) vaccines are ready for these markets – again from major "vaccine" designers, and you must not call this a conspiracy – with a tried & tested 4-injection course to achieve maximum nano-particle saturation without too many **short-term 'side'effects**, marketed as 2 shots + 2 boosters; Where have I seen this before?... But how to make test/herd animals want these jab shots?

Mention herd immunity for disease "elimination", sold with mandatory/compulsory vaccination for the greater good… **[**Germany recently ran this trick for compulsory Measles-only vaccination of children, while only the multi-disease **MMR (**2nd **M** empty now due to "vaccination" mumps…**)** vaccine is available – the one which contained at some stage the extreme long-term poison (**M**)ethyl**M**ercu**R**y; how about adding '**N**' for graphene-oxide **N**anoparticles etc?...**]**. Then it will only be months until official infection with the Greek-lettered word "Covid" — the rest you know **:** The high doses of nano"adjuvants" caused Africa-wide **"**Monkey**"**pox instead**…** 1%-rich-list fascists with too much accumulated wealth to lose ↔ everyone else, in total breach of the social contract; truly the **III. The attached 62-year-old cell-phone-loving man had 3 Covid shots, and 2 months later the hospital cannot treat this "infection"**:** The cell-phone-holding left hand is wider affected, but the palm of the cell-phone-scrolling right hand took the brunt. Obviously it can't be monkeypox, nor can they officially declare it a new symptom of the terminal aerially-transmitted contagious cell-phone disease, can they?

You see, the trillions of organisms that constitute you have 3 'choices' when their ability or position is damaged eg. by nanoparticle cell-phone magnetofection: Either be eaten dead or alive, or exit as lower organisms, or take whatever they can by "parasiting" **–** hence the success of Ivermectin against Covid? This man experienced divine timing for these photos to reach us: When he was cut open like a can of fish (or worms?) for a bypass operation, his aorta layers separated **—** a vaccine-myocarditis 'side'effect?

Monkey Pox ?

They made us believe in herd immunity against Covid – Sheeple & Cattle flocked to vaccinations.

This turned into an avalanche of "mild" Omicron for vaccinées, spreading faster than measles or any other infectious disease; Contact tracing was dropped in a hurry to let Omicron find the contacts. But masks had to be worn to remind everyone of airborne transmission. In NewZealand the 100% full mandatory-vaxxed teachers had the highest infection rate, all due to unvaxxed pupils not wearing masks **!**

Good news still: RATs, sheeple & cattle now achieve monkey status, monkeypox appearing worldwide out of nowhere. What a relief, because another Covid variant wouldn't have made them accept/comply with further mRNA "booster"vaccinations in a vicious circle, where lopsided-spiralling statistics counted vaxxed sheeple without the latest "booster"shots as unvaxxed, thus also attributing Covid side effects to the unvaxxed pure, those mad pandemic drivers that require compulsory-mandatory vaccinations**!**

Now the China Wuhan laboratory (owned by Pfizer's parents) **synthesised** a virus DNA, but only less than 30% of the monkeypox DNA despite that a full natural copy is readily available in Africa — just as done with the Covid-PCR-test calibration/reference with inserted HIV, flu, etc. parts so that it could not reliably differ between flu's and Covid, as German scientists found out. A 100% copy could only detect true monkeypox, and would prevent establishment of a pandemic with emergency vaccine-$ licences and compulsory-mandatory vaccinations, leading us into a Covid-like no-exit maze **:** Now the high doses of nano"adjuvants" are causing Africa-wide 'Monkey'pox instead… What is missing here?
Let's start again **:**

Vaccination Covid Pox !

Traditional live-virus vaccines can show side effects at the inoculation site, called eg. vaccination rabies/pox/etc., while deep injections shift such obvious reactions onto other body-wide symptoms **(**eg. acne?**)**. Long-term side effects were difficult to pinpoint due to lack of medical surveillance and gene tests via computers. Thus Polio was **eliminated** by renaming it as Multiple Sclerosis to ensure that the Polio vaccine worked – without side effects, of course… (Obviously this can't be proven today, can it?)

Today medium- and long-term vaccine "side"effects would show-up statistically, esp. in NewZealand which had eliminated all α-β-δ Covid variants. Solution:

Rename medium-term vaccine "side"effects as Omicron; When ***advanced accumulation effects are starting to emerge, disconnect them from Covid origin by renaming them as . . . . . .***..**

I believe you can finish this article yourselves now, just don't forget to insert at least one more 30%-mRNA/DNA-spike-protein vaccination loop…

Forced-Medication Poisoning Via Folic Acid In Bread

I received this message from Bürgen Breads: "Our bakery at Christchurch does use municipal water for Burgen bread. The QA Manager has advised that currently the water is not fluoridated, but that Christchurch City Council is preparing to fluoridate the city's drinking water supply, no dates have been given yet. Regards folic acid, our Burgen range is made with flour fortified with folic acid, except for the gluten free varieties. The NZ Government has mandated that all non-organic wheat flour used for making bread must be fortified with the B vitamin, folic acid, by mid-2023."

Some German Bread Background: Just like German beer is brewed with only 4 ingredients according to the 1516 purity law, German bread loaves contain for centuries only 7 ingredients according to bakers' tradition. German rye bread is a very dense long-lasting speciality, called "black bread" — unlike NZ's (NewWorld, 4 Square, etc) "German rye bread" that only achieves a medium-brown through food colouring; German rye bread is just that, while NZ's pretence is mainly wheat bread with compulsory added "folic acid" and a few rye kibbles, a criminal con!

Bread is a fundamental basic food in Germany, and there exists a saying that in prison you get only bread & water — whereas in royal NZ you would die from lack of nutrients together from water fluoridation & "folic acid": Fluorides change the stomach's chloric acid into extreme damaging & poisonous Fluoric Acid, damaging everything incl. the teeth from within! See **Letter to Governor-General.pdf :** https://drive.google.com/file/d/1hnaVbSr7qRItwSYDq9C946qTuOEyA6v2/view?usp=sharing.

As expensive organic or gluten-free breads (all soon made with fluoridated water) are usually not available in rural grocery stores (too risky to stock), this becomes forced "folic-acid" addition on the pretence of health benefits for pregnant women (less than 5% at any time), while unpregnant men (50% of the population) are force-medicated without any health benefit whatsoever!!! It is therefore most reasonable to suspect that the true purpose is most malicious **:** In NZ no-one would or could test "folic acid" (a carbon-ring structure) for hidden lethal superparamagnetic nanoparticles like graphene oxide (a multi-carbon-ring nano-graphite-honeycomb structure), which is also the true cause for covid vaccines' "side"effects that are covered-up as covid-disease variants, esp. Omicron now, originally planned as a never-ending vicious fatal circle. "Folic acid" as the fascists' alternative to "vaccines", yeah right...

A democracy-safeguarding Constitution Court would quash such forced medication: Germany's parliament just dismissed the government's trial to make covid vaccination compulsory in any shape due to this likely outcome, which is unthinkable under NZ's fascistic monarchy!

See **Universal Democracy Constitution** .pdf:
https://drive.google.com/file/d/1ebshn4iijKR52BMobQOE_0bVtD3DXIhP/view?usp=sharing.

German-pretence Bürgen bread is slightly better than NZ's white dish-cloth bread, which is of old English origin using low-quality flour for the peasants after royal aristocrats had their pick first, because monarchs traditionally love their peasants (the Public) so much --- to death under today's overpopulation... I am now effectively forced to eliminate bread from my diet, as well as food processed with fluoridated water (it is not even declared in the ingredients list)!

What is the Green Party's policy about such officially forced food poisoning?

Extreme Fluoridation Warning !

Whereas ultra-sharp [superpara]magnetic nanoparticles (incl. electrically conductive flakes of aluminium/ graphene oxide) damage the body via electro-magnetic-mechanical vibration-cutting actions under cell-phone-GHz-frequency influence**,** fluoric acid catalysator-like chemically cuts/separates molecules (incl. in DNA and brain cells) thus creating free radicals, now amplified by above mechanical method **:** —-- 2.5 GHz microwave-oven radiation heats/cooks **polarised** aerial-chain-forming water molecules**; Fluoric acid is probably the most permanently & strongly polarised molecule**, and water fluoridation (fluoridated salt in Europe except water-fluoridated Britain) ends-up as hydrofluoric acid from fluorides converting the stomach's hydrochloric acid. These fluorides originate from industrial hazardous-waste **!**

Fluoric acid thus joins graphene oxide as the true Covid 'spike protein'? – 'Extra'polating the established systemic Covid method(s) correctly, fluoridation 'side'effects will anonymously achieve Long-Covid or another Greek-lettered-variant status via different vaccination batch numbers… **Idea of the year :**

Omniconmi variants are now called BA x **;** ' BA ' stands for vaccine batch**,** or not [p.19-21,52] ?...

NewZealand's latest developments in compulsory vaccination / water fluoridation:

NZ's previous chief "science" adviser (Gluckman) to the (conservative-fascistic) royal NZ government advocated "the more fluoride, the better". He got a royal "sir" title for his official public-henchman prostitution**:** In fluoridated Auckland there were 50 new children added to the 2000+ waiting list every week for emergency dental treatment (waiting time was 8 months; RNZ news 17/11/20), which this water fluoridation should have **at least** prevented – while instead causing widespread bodily damageonly visible through tooth decay. This real-life evidence against water fluoridation is of much higher quality than Gluckman's official report's statistical pro-fluoridation pseudo evidence that **could not be established** due to the dominance of toothpaste fluoridation **!** But **water fluoridation** is here to stay:

On RadioNZ 28/7/2022, the unelected NZ Director (dictator Bloomfield, now also with a royal "sir" title…) of Public Health, having already resigned as consequence of wrong covid-related decisions, used a recent law change to order in his final day(s) fluoridation of water supplies of some localities that have a higher percentage of Maori, thus setting a secret-agenda precedence for general compulsory medical treatment (incl. forced vaccinations)! — Poor Maori are unlikely to challenge this dictatorship in the monarch's court. He even justified it with NZ's "low" background-fluoride levels, while the EU refused to set minimum levels due to a total lack of physiological need of the body for fluorides!… And a flood of dementia cases emerged, too, as fluoric acid also affects the nerve system. A very unusual High-Court decision later reversed it, because he did not consider NZ's Bill of Rights Act 1990 (**[2023] NZHC 3183**) **!** By the way: This should **sufficiently prove** that compulsory water fluoridation is the true main purpose of the intended centralised control of NZ's local governments' water-infrastructure assets, which was started by the National Party (its leaders favoured compulsory vaccination!) initiating to give this Director of Public Health such (slow-)murder dictator powers !!!

Aluminium, a Covid-Vax "Adjuvant" ?

Fritz Fehling, 21-30/3/2023

What foods contain aluminium? **Processed cheeses, baking powders, cake mixes, frozen dough, pancake mixes, self-rising flours and pickled vegetables** may contain **substantial** amounts of aluminium-containing food additives, which are leavening agents, emulsifiers and anti-caking agents.

[This list omitted freely-pouring NewZealand table salt…**]**

Is aluminium metal suitable for food? It can migrate from aluminium foil and uncoated aluminium trays to acidic and salty foods. The **German Federal Institute for Risk Assessment** therefore recommends using coated aluminium trays to heat, keep warm and store acidic and salty foods [-- hence the requirement for alu containers like beer cans to be coated eg. with a plastic liner, but oven heat can damage coatings. Anodised alu already has a tough coating].

What are the side effects of aluminium in food? Studies have linked frequent high-level alu exposure to adverse health effects on the central or peripheral nervous system (eg. Alzheimer's disease), bones, lungs, fertility, embryos. **[**Links to Alzheimer's, dementia or other long-term "side"effects, just like with (Covid)vaccines, will never be 100% proven, nor any efficacy of future dementia vaccines – how to diagnose early dementia in lab rats unable to pronounce the English "th"?...**:]** In humans, aluminium acts specifically on nerve cells and nerve tissue, disrupting **membrane proteins** and interactions in ion channels. **[**so can metal (nano)flakes under electro-magnetic radiation…**]**.

infothek-gesundheit.de/aluminium-gefahr-fuer-die-gesundheit-diagnose-ausleitung

In what form is aluminium harmful? The danger comes from aluminium's soluble form, "probably" not from the metal itself. Aluminium dissolves when in contact with acid and salt **[**like with stomach acid, thus the metal itself can be harmful, and alu-metal (nano)flakes esp. in the blood could react to electro-magnetic radiation, like with vaccines...**:]**

Is there aluminium in flu vaccine? **Yes, many vaccines contain aluminium**, like for **hepatitis A, hepatitis B, diphtheria-tetanus-containing vaccines, haemophilus influenza type b, and pneumococcal vaccines**, but it is not used in live viral vaccines, such as varicella, rotavirus, and measles, mumps, rubella **[**Really? But they earlier did add extreme poisonous (m)ethyl**mercury** into MMR vaccines…**]**.

Inactive [non-live] vaccines can contain aluminium as adjuvant **[—** eg. mRNA-lipid covered metal-flakes to grind mRNA into the cells via cell-phone radiation?...**]: "**Adjuvants enhance the immune response (help the vaccine work better) so that fewer amounts of active ingredients and **fewer doses** of vaccine are needed.**"** **[**well, not quite – hence Covid booster jabs…**]**

"Aluminium adjuvants are widely used in human and veterinary vaccines. They are appropriate adjuvants for vaccines that confer protection by inducing antibodies via the induction of a type 2 immune response, but they do not induce cytotoxic T cell and cell-mediated immunity. The mechanisms by which aluminium adjuvants selectively enhance the immune response are **poorly understood [!]**. Following exposure to interstitial fluid in vitro and in vivo, most antigens are rapidly desorbed from aluminium adjuvants, suggesting that sustained release of antigen from a depot does not significantly contribute to the adjuvant effect of aluminium compounds. However, the adsorption of antigens onto aluminium salts may result in a high local concentration of antigens at the injection site and enhance the uptake by antigen-presenting cells. Aluminium compounds can further enhance the immune response by direct or indirect stimulation of dendritic cells, activation of complement and by inducing the release of chemokines. The relative importance of these mechanisms **remains to be determined "** **[**maybe electro-magnetic radiation is needed as their "activator"...**]** *Pubmed: Aluminum compounds can further enhance the immune response*

"...Adsorption of antigens onto aluminium compounds depends heavily on **electrostatic forces** between adjuvant and antigen. Two commonly used aluminium adjuvants, aluminium hydroxide **[**also in table salt**]** and aluminium phosphate, have opposite charge at a neutral pH…**"**

Pubmed: Aluminium compounds as vaccine adjuvants

TOP

This indicates susceptibility to electro-magnetic (cell-phone) radiation, with the ability to not only form polarised chains, but also conductive sharp nano-metal/-graphite flakes --- no need to inject ready-made nano-metal /-graphite. It would explain vaccine "side"effects **!** (see link **a)** below)

— ***Could it be that the body correctly identifies nano-lipid"adjuvants" as lethal invaders ?...*** **—**

Is it purely-naïve a systemic-bigger-picture "coincidence" that such "adjuvants" cannot be avoided due to **compulsory** addition to basic foods (eg. fluoric acid via fluoridation, folic acid in wheat, aluminium hidden in food additives —- or nano-metal / -graphite hidden in Covid vaccines via "reducing agents"?

For completeness, Google's search AI also came up with: **"**Does aluminum salt help with COVID? --- It has been observed that **aluminum salts have beneficial effects in COVID-19 cases**. Considering the low systemic toxicity of intermittent oral intake of aluminum salt as food supplements and the fact that pandemic control is still not achieved, the use of aluminum salts is promising. 17/12/2020 **"**

Yeah right, if vax **is** Covid…

During the pandemic there were reports that people experienced parasite-like skin problems and felt something sticking out. We had to use total-artificial hand"sanitisers" before entering shops. *Reasonable explanation:* Microwave penetration depth could be increased by "cosmetically" applying "reducing agents" for self-assembling nano-wire aerials through the skin into blood vessels, vax-loaded with similar agents**;** Heart inflammation via hand-through-body-to-hand nano-wire aerials could follow**: *High-voltage energy is not needed due to the blood flow bringing injected nanoparticles (****and*** *released phosphor/ sulphur ions)* ***randomly close together for connections, forming Thrombosis (nano-graphite-web aerials?), which can apparently also form outside the body… !*** Super-high-thinking microwave-chemistry scientists never thought their work could be used against themselves to the max. ...

A Biological Approach Not Only to Dental-Care Science

This advertisement video about dental care without "conventional" dental-care products or dentist visits is truly mind boggling and logical, although it ends in a more-than-typical American marketing excess/bore that in-itself raises doubts about this product. The treatment/remedy is specially developed non-GMO mouth-flora bacteria (but can you believe Americans in this regard?), in line with the very nature of life and natural evolution! This video claims in a reasonable way that dental-care products incl. toothpastes with detergents, abrasives, antibiotics and esp. highly-poisonous fluorides damage and kill the natural-beneficial bacteria that naturally create an equilibrium with not-so-good bacteria, germs and viruses in the mouth, negatively affecting even the whole body [eg. Fluorides change the stomach's hydrochloric acid partly into hydrofluoric acid that permeates the body separating complex molecules before ending-up as calcium fluoride in the bones & teeth, showing as "natural-ageing" bones-chelating brittle-bones osteoporosis; It also causes people to be docile as every poison would — researched by Nazi-Hitler's scientists on concentration-camp inmates…].

Generally it is against my principle to be someone's business' free advertiser, esp. as I have not tried this product and thus have not experienced positive advertised results; But I recommend this video purely for a different approach to medical and general science **:** prodentim.com/video.php?hop=mzjle

The Breakthrough Biological Explanation of the Human Condition
– Repairing Our Destructive Schizophrenic Human Mind by Explaining its Origin –

Humans (or even Nature itself?) "fell from grace" when gene-/instinctive-learning created/was supplemented by conscious neuron-learning a million years ago, which created language with abstract thinking, self-awareness (consciousness) and "knowledge" (later science). This controversy was already recognised by ancient Greeks, and is also the biblical controversy starting with Adam & Eve eating the apple from the tree of knowledge thus losing paradise. Unbeknown to most of us, as an example and proof of such "theoretical"paradise there exists an ape race (99% gene-identical to us) that lives in pre-consciousness/-knowledge, but in an extremely caring environmentally holistic social way outperforming us by miles — or is it a Hollywood-style computer-animated illusion/trick?...
A conclusion could be that humanity is fundamentally not evil, but instead nature's hero that fails to recognise and cope with this controversy and misleads itself in a schizophrenic way, separating itself from nature and resulting in all those angry egocentric violent excesses/excuses called history which now threaten us with extinction. Space-X Harp

Fritz Fehling, 21/7-10/8//2023

A week or so ago I saw a new rather tight satellite chain moving across NewZealand from SW to NE after nightfall. Today I suddenly got the idea that the microwave-oven-produced passive-polarised-chain heating could be inverted into active-polarised-chain radiation by synchronised in-line satellite-senders, thus avoiding the wasteful traditional high-voltage method. *Let's hone-in on the target then*:

The present cell-phone network could be seen as the crudest form of beamforming by addressing any cell-phone only with the tower closest within its range. 5G beamforming means an uninterrupted line or field of aerials that can conserve energy by incremental phase/delay between adjacent aerials, thus radiating in a specific direction by controlling the produced interference pattern.

The multi-satellite lines are a few 100km up to more than 1000km long, the distance between the satellites being much larger than 1km, while the 5G wavelength is mm range. They cannot strongly use the above beamforming method, but the exact straight line, together with the concave curve of the many synchronised aerial-satellites, produce a strongly-polarised amplified and focussing radiation not unlike a maser / laser – only for polarised-chain-creating target substrates!

As they move only a few minutes across a country (their radiation bursts unaccountable for averaging radiation meters, measuring maximal only one satellite pair), their purpose cannot be constant 5G-internet communication for the public, nor destruction of enemies' electronics — but of their bodies that have been saturated with **conductive nano-particles via vaccinations**, making them vibrate in-line like eardrums hearing a heavenly death-angel's harp — the American 'defence'-research HAARP aerials (for satellite-chain calibration?) refined into a lethal electric "harp" that the public can't hear or control? Criss-crossing satellite chains sending polarised-chain noise for next Disease-X™ pandemic in vaccinated victims? Is this the Star-Wars weapon development former U.S. (Alzheimer's) president Reagon was only talking about? Could polarised-chain moisture militarise the weather, too, as conspiracy theorists claim?

Harps not only in space**:** Russian cannon fodder in Ukraine now suffer from "**mouse fever**", a variant of the Wuhan-bat virus the world is now so literally familiar with?... This aurora can be regarded as an ultra-huge sunset rainbow using this refraction through roughly-evenly arranged water molecules in the highest atmosphere, together with an incremental light-reflecting **(-**bending**)** effect similar to fibre-optics cables, starting near the terminator-halo (day-to-night border). Missing 5G-Microwave-Resonance Limits

Fritz Fehling 27/7/24

Explanation of the Resonance Phenomenon and Microwave-Radiation Limits

Relevant for radiation **(**vibration**)** safety limits is the *destructive* ***potential*** of an electro-magnetic **(**or correspondingly of a mechanical**)** oscillation to induce */* transfer power into an electro-magnetic **(**or mechanical**)** receiver. It is highest when the receiver's own natural frequency is in resonance with the equal sender frequency, much like an electric-guitar string screaming into its upper resonance bandwidth and the amplifier's limits through a loudspeaker-feedback loop.

This resonance-power maximum results from the vibration **(**movement**)** of electro-magnetic charges **(**or mechanical mass**)** between a vibration's **(**kinetic energy**)** displacement limits in perfect timing for opposite accelerations by the sender — The higher the resonance frequency, the less oscillation amplitude **(**magnitude, displacement**)** is inverse-proportionally needed to transfer the same power, because the smaller transferals are repeated sharper */* faster *and* more often across the shorter displacement **:**

P = W / t = F · s / t

Power Work,Energy *per* **time (Field)Force** *by* **displacemen**t *per* **time**

[*Force* ***is proportional to*** *sender Amplitude****;*** *displacement****-per-****time* ***proportional to*** *receiver Frequency****]***

This induced resonance-oscillation power against the receiver's resistance **(**friction**)** is highest, if latter is equal to the combined inner release resistance of the sender system(s)**;** The higher, the flatter the resonance-bandwidth curve, increasing the bandwidth for near-resonance oscillation(s) on cost of their amplitudes **(**magnitudes**).** Aerials are designed for such resonance-optimum gain in compromise with the desired frequency-selection bandwidth, often using coils */* capacitors to reduce any impracticable aerial length esp. at lower frequencies, because the wavelength is inversely-proportional to the frequency.

How can ***5G****-microwave radiation translate into health-damaging effects in the body****?*** — An oscillating electrical (field)force causes water molecules to alternatingly shift their 2 hydrogen atoms towards one side and thus polarise the whole molecule, which then self-assemble with other polarised molecules to ever-increasing in-row columns, increasingly becoming max.-power resonance-wavelength aerials**;** If enough power is transferred, a microwave-oven-like direct heating of the body can occur. On a macro-level, ferrous-oxide-containing blood cells in fractional-aerial-shaped blood vessels can behave similarly regarding the radiation's magnetic component, called "pearl chains", leading medium-term to ***fatal*** clots **!**

But damages can occur at much lower power levels due to chemical changes to molecules incl. DNA**;** A recent theory suggests that coiled DNA can present fractional antennas for multiple frequencies. Such aerial effects are enhanced if the body contains electro-magnetically-conducting (lipid or "adjuvant") nanoparticles injected as "vaccines", eg. graphene-ferrous-oxide that is better conductive than copper **:** These can ***far-more-readily*** ***self-assemble*** to tough ***permanent*** aerial chains with higher resonance-bandwidth curve, outperforming water molecules' temporary-only polarised chains above.

Present radiation limits derive from an impracticable microwave-oven limit covering only short- term damage via heating, ignoring self-assembling molecular alterations under lower-radiation resonance **—** and that *the higher the* ***5G*** *frequency, the earlier such molecule-resonance-chain build-up is reached, the lower the required amplitude,* thus esp. affecting small children/animals/insects through *total* penetration.

5G-radiation-heating limits must be reduced ***more*** than the **100**-fold 5G-practice, with a frequency-proportional factor, and a further ***at least*** **10**-fold reduction due to the ***superposition*** of random multiple-direction frequencies onto MIMO beamforming, producing damaging pulses */* spikes in real life **:**

Power limits are propaganda fiction**:** There exist no true-broad-spectrum-3D ***power***-meter aerials

(mW/cm^2 is physically wrongly derived from x-y axis' field strength mV/cm **[** $V^2 \sim W \triangleq U^2/R$ **]**) **…**

Such >1000-fold reduction should lay the *total-5G-surveillance* cell-phone era to rest …

Nature's Flu Versus Human's Ignorant Arrogance

Correct Definition of (tried) Murder: **"** Intentional (attempted) shortening of any individual's life (except in self-defence) without the explicit non-coerced agreement **"** — Now even "legalised" in euthanasia-murder laws that contain ***no*** safeguards against murder **!** In the case of mRNA "vaccines" it would be sufficient proof if the producers **/** designers **/** promoters knew of the graphene-ferrous-oxide (lipid and "adjuvant") nanoparticles that cause fatal damages via clots or other 'side'effects.
The British monarchs' (and others') definition of murder **(**and manslaughter**)** is deliberately insufficient by inserting a time limit between the murderous act and the fatal result, because ***all*** monarchs were murderers using their fascists (eg. freemasons and their Rotary-Lions-business-clubs**/**wolf-in-sheepskin-Fabian**/**etc. subsidiaries) as executioners **!** **Thus not only NZ's last 3 PrimeMinisters are murderers !:**

Official Flu Propaganda : A theory condemning the flu as an external-viral disease (incl. Covid-19) that has to be fought as comfortably convenient as possible with poison cocktails, painkillers and kill-shot vaccines — the latest mRNA vaccines undeclaredly contain graphene-ferrous-oxide (lipid and "adjuvant") nanoparticles self-assembling under microwave radiation to form fatal feet-long strings, which capture the body's resulting flu-waste products as whitish blood-vessel clots. This 'scientific'-theory deception covers-up committing mass-murder war through compulsory-mandatory-vaccination pandemics **…**

Problem No.2**:** NZ (WHO…) microwave exposure limits are set to 0.08W/kg, with localised cell-phone radiation 25 times higher up to 2W/kg, an averaging microwave-oven-heating measurement impracticable & false for open-field exposures **!** Current limits ignore multi-directional sources' different superposing peak-power densities (per exposed area) in real life, or drastically increased penetration depths relative to ("vaccine"-) injected electro-magnetic nanoparticles or to small bodies (children). The following ***scientific*** studies used 5-30 mW/cm^2 to ***prove*** that microwave exposures cause ***non-therma***l body damage **! :**

Nature's Flu Reality : A concerted effort by the intelligent living body to remove accumulated parasites, pathogens and damaged cells (eg. compromised through microwaves), and transport them to the nose, throat, etc. to be sneezed-out, coughed-out, pissed-out and excremented-out.

Problem No.3**:** Modern complacent inactive lifestyles do not actively support such cleansing process, thus allowing the dislocated pathogens to re-anchor and clot in calm places, producing accumulating hindrances to blood and oxygen circulations, diagnosed as various diseases with ultimate death years **/** decades later. Being permanently fat and convenient is incompatible with nature's major principle.

Problem No.4**:** Total prevention of this natural cleansing process by interference through artificial medication **(**incl."vaccinations", now combined with electro-magnetic radiation**);** Their 'side'effects **(**incl. "LongCovid"**)** prevent discovery and active sensual regulations of this process.

Problem No.5**:** Total ignorant-arrogant separation from Nature's principles — the major principle is the continued active training of body and mind to be able to overcome any challenge to one's life, which resulted in all the different highly-intelligent life forms **/** shapes **—** incl. humans who cannot reach the specific intelligence of eg. birds, or even just any shit-eating fly that outperforms any arrogant fighter pilot, esp. when landing upside-down under a ceiling and then starting again **…**

Caution: Official Statistics Contain Systemic Errors !

The purpose of average/statistics is to overcome any lack of reliable precision data by looking at the bigger picture for decision making. Statistical-distribution theory incl. the bell curve, data gathering requirements, and interpretations can involve some higher maths and require professionals like statisticians. Let's look at excess death rates currently used by govt critics to uncover deaths resulting from Covid vaccines, because during the pandemic govts had knowingly collected data that disable reliable cause-death connections **:** Uncertain causes can be classified as "natural"causes. Currently the excess death rate of a period is compared to the average death rate of the past 5 years.

Problem: If excess deaths are caused by a continuing long-term exposure to new, persistent or even accumulating poisons (here from Covid vaccines), then they will be included every successive year in the 5-year average, creepingly raising them to the "new normal" thus eliminating them from view after 6 years, despite that they factually fully exist and possibly even increase compared to pre-jab statistics. Later this will reverse into an "excess-longevity" illusion as the higher-average-excess-death-causing vaxxed die out, creating a virtual vaccine-justification success – but only regarding fatality, really! In a 10-15-year oscillation new illusionary pandemics could be created with new-disease mRNA tags for positive PCR tests and vaccination loops with vax IDs etc., not unlike the share-market crash cycle…
It is similar to the ideal average baby weight: As parents try to achieve it, their skinnier babies will be fed weight, thus increasing this average weight and leading to a new "ideal" that will in fact become overweight or fat – this is one reason for society's statistical overweight, in addition to lack of exercise while snack-crunchingly exercising the TV and internet…

Solution: Comparing the death rate (always per population size) to 5-10 year periods ***before*** *the* appearance of the new poison; This would provide a far more neutral measure exposing vaccine-caused excess deaths. **But caution:** Even this method will increasingly contain misleading cause-hiding biases **!** As these vaccines are now commonly rejected after the initial high uptake, then with every vaccine-cause death the percentage of living vaxxed decreases and thus related future vaccine deaths, despite that their relative mortality remained high or even increased (which would also be partly due to natural ageing). A yearly side statistics of vaxxed deaths per still-living vaxxed, in comparison to unvaxxed deaths per still-living unvaxxed of that vaccination period would be a more neutral assessment. However, newly broadly- introduced (flu, mRNA) vaccines with similar hidden poisons would reduce any differences.
From 2025 elderly are injected the Covid "vaccine" into one, and a flu vaccine into the other shoulder**;** Any (ultimately fatal) side effects skew the statistics unnotified**:** Which shot caused it? —
Voilà, mRNA "vaccines" creepingly become side-effect-"free", ready for pandemic breakfast…

Conclusion: Wherever you look at govt (esp. health) statistics, most of them are **deliberately** skewed**/**biased**/**false**,** also because the govt statisticians are incompetent — it is dangerous to blindly use them for decision making. The less democracy, the fewer checks & balances, because a dictating fascistic minority's single officials would always lift fellow brotherhood mates into higher positions beyond their competence, incl. judges, govt statisticians, chief science advisers, directors of public health, etc. (fascistic corruption **is** incompetence, let's face it). All hidden from view while pretending democracy…

A similar fascistic majority-skewing principle is used in corporations aiming to overrule internal democracy: They can "own" other corporations with originally only 51% shareholding majority of the parent company in a repeating 51%-chain. This leads to "ownership" of companies down the chain with factually an exponentially decreasing minority, esp. when financial institutions / holding companies hold voting-right shares due to debt -– a pyramid scam that must be outlawed**,** worse than the British / USA First-Past-The-Post relative-majority-minority-rule "electoral" democracy fraud. Powerplay: Fight Risk With Risk !?

Fritz Fehling, 17/12/2022

There are base risks that you want to reduce or better eliminate, eg. that of a disease like Covid (any similarity to reality is purely fictional…). Not of catching it, because the parameters are unknown (they used the R transmission rate instead), but of dying from it. In Europe Measles mortality is roughly 0.01-0.05%, while Covid mortality is 0.08-0.5% (death **with** Covid was internationally listed as death **from** Covid, while the tests themselves were not accurate; false-statistics propaganda).

To keep it simple, let's stick with the Covid example: Problems appear when your tools to reduce such risks present risks themselves, which cannot be determined in a hurry (esp. for long-term risks), also due to the varying circumstances (parameters). Statistics is the method to deal with all those interacting and even unknown parameters; the higher the number of test animals (incl. humans) and longer the testing period, the more accurate the risk calculation (it is always average and thus a substitute for precision…).

Vaccines were the new risk-reducing tool, and for safety & speed reasons serious adverse reactions that could result in death were considered. Looked all good through official pharma-$ propaganda lens, and you use it — for "free" in a declared epidemic/pandemic. But then this power tool's true efficacy plummeted within weeks (no immunity whatsoever even after booster shots), while unmentioned heart-inflammation "side"effects suddenly emerged**,** first in quasi-compulsory-vaccinated Israel, then ***everywhere else*** after the vaccine cause could not be denied any more. Solution: more power of the same stuff in form of 2_{nd} + 2 booster shots (+ planned yearly refreshment shots later), each with such potential "side"effects. You guessed it now (but not then)**:** The risk suddenly increased (but not straightforwardly 4-fold), and **no official scientist** supposedly **conversant with risk calculations was meant to tell you**. When does this additional jab-shot risk (incl. statistically correct inverse-efficacy called "break-through") become greater than the disease risk? Certainly, the more jabs, the higher the risk.

Russian Roulette (see **Wikipedia**) is the simple analogy: 16.7% risk with a 6-shooter, but at the 6th trial (jab-shot, with a new "throw of dice" each time) the risk increases to 66.5% instead of 16.7% ! How come? — The more you play it, the more likely you kiss the bullet, and only one is enough… If you don't play Lotto, you can't win, would be your governments' spin — I may optimistically complain by saying that Lotto seems not to work like this, failure after failure is the rule instead…

If these "side"effects are also caused by superparamagnetic particle (eg. graphene-oxide / graphite nanoparticles) "contamination" in some vaccine batches, activated by cell-phone radiation cutting through all soft tissue, and accumulating until polarised-chain saturation by each jab from such batches creates long blood-vessel clots, the risk increase becomes exponential. Calm down, the risk peters-out once you approach 100%, because it mutates into certainty as you are dying or dead…

However, despite provisional-medicine character, criminal fascistic-corrupt NZ judges ruled in favour of mandatory-compulsory "vaccination"; In this way they indirectly installed a murder-proof requirement for potential-population-murder vaccines – while NZ coroners can now list a vaccination death as being of unknown natural cause, if a connection cannot be **proven**. Furthermore, court proofs require an evidence chain (of eg. graphene-oxide / nano-graphite contamination) incl. vaccine batch numbers, well-knowing that this could cost batch-no.-providing health professionals their jobs, thus discouraging such evidence.

Vaccination critics are therefore disabled to **prove** deadly "side"effects, also being disabled to run trials on living humans…, while the vaccines' mRNA delivery method remains pharma-business secret — all in total prevention of informed consent and any democracy safeguard. This is first-past-the-[later]post pseudo logic, when a serious probability of such cell-phone-activated systemic batch contamination should have been sufficient to stop collateral-damage murder vaccinations.

Officially you are not supposed to wonder or ponder, just do as you are told…

World, Watch (NZ's) Covid Science! Fritz Fehling, 5/4/2022

Summary of the Biggest Ever Deception and Coup d'État

On 28/2/22 the NZ Herald and Greymouth Star reported that a NZ Ministry-of-Health spokeswoman said the long-term physiological and psychological effects of Covid-19 were not yet known. However, a top heart-research professor of its District Health Board said [Delta-]vaccinations with boosters provided good protection against the 3-months-old-Omicron's Long-Covid with its tsunami of heart disease and a myriad of other debilitating symptoms – **which were similar to Delta's Long-Covid symptoms** !...

According to RadioNZ Saturdays' scientist interviews they don't even know why the Delta-vaccines' low Omicron efficacy works, but now [ever-increasingly-]highly-infectious Omicron is mild because of high Delta-vaccination rates; Can someone help finding the lost Delta, logic not needed?

Can it not be separated because all vaccinated are nurturing its spike protein ?...

With such reliable lack of knowledge (NZ's governments fund research only if they know & accept the outcome – in advance), let us expand on this official scientific thesis of fudging diagnosis, prevention & treatment:

If NZ can morph superparamagnetic-nanoparticles' "side"effects (identical with Delta-vaccines' "side"effects) into Omicron-transmissions/-Long-Covid after being only 3 months on the scientific propaganda market, then the covid / test creators can surely redefine Delta as the milder Omicron – after they had to remove those nanoparticles from vaccines due to discovery. Final omicron thus skipped a few Greek letters from delta to indicate to fascist brothers that this pandemic has to be terminated in a hurry due to uncovering of its cause ... the high (nanoparticle) vaccination rate? While you have to wear filters with a mesh far wider than the virus or those nanoparticles, to quash aerial-transmission doubts; Could they also come from this occasionally contaminated protection/testing gear?... The American vaccine designers even tried to hide these "side"effects behind an official 75-year military-style secrecy classification, despite informed-consent requirements for injecting provisional medicines into you, obviously the main objective. If you feel covidly demented or confused now, the vaxxed mental-health service will perform the **Great-Reset** booster on you, and others: The WHO and Lancet already predicted a 3-fold rise in dementia due to (but also regardless of) increasing & ageing populace (see earlier article). What's the difference between gene tech and rocket science? – After modification of its spike-protein gene science itself becomes alive.

Let's not stop here**:** No need for a democracy-safeguarding constitution court judging against eg. electronic voting that perverts democracy – All you need is a secretive PCR-test program in e.g. America requiring your details in breach of privacy laws for *arbitrarily diagnosing [also asymptomatic] Covid using DNA snippets* /"contaminations" from other diseases (incl. HIV, flu's, cancers, ...), so that a pandemic can be established with kill-shot vaccinations etc. as response. Any survivors will either be unvaxxed 1%-rich-list fascists, or their short-lived serfs under herd-immune RATs for mandatory-compulsory **C**ertificate-**O**f-**V**accination-**ID** vaxpasses, as their redefinition of all human rights. Russia's conventional Ukraine war is just a welcome distraction from you seeing this pandemical war against yourselves.

At first unvaxxed sheeple got shots to **prevent** infections; Then they counted as not-fully-vaxxed without a 2_{nd} shot (unvaxxed for fine-tuning the pandemic statistic**s,** incl. **all** death**s** **with** covid rather than the 10%-15% **from** covid), followed by denial of vaxpass if not booster-shot (unvaxxed for pandemic's future covid-variant death statistics…), while Israel already enforced the 2_{nd} booster shot – It is called "shifting the goalposts" so that you couldn't win, also "spin" or "PR". Sheeple are now afraid even of mild (logically at least supermild for vaccinées, shouldn't it?) Omniconmi transmission. **Get a life:**

Life is one big risk ! — Don't take it ?…

Let's replace American "get f...ed!" slang with .. .. .. "**Get Vaccinated!**"

Read the signs: # NZ's Royal Fascism Now Burns Books Fritz Fehling, 17/5/2022

Copy also to NZ's Governor-General (**Uncensored has ceased publication**)

Modern Hitler-type book-burning goes like this — the following e-mail was sent to NZ's Westland District Council: "To the mayor Bruce Smith & the chief executive officer!

Hokitika/Westland District Council library has removed all Uncensored-Magazines (I donated them), while continuing to present the fascistic-freemason magazine (usually right besides the Uncensored-Magazines**;** freemasons are by definition fascistic and thus antidemocratic/ criminally corrupt, and certainly not charitable as pretended). This is extreme censorship-bias totally unbecoming for a public library service! The library manager is fond of freemasons due to her relative(s) being member(s) -- now apparently a reason for her employment, and proves to be unsuitable as a manager of a public library in a democracy (as opposed to a fascistic monarchy -- the monarch's late husband was a known freemason now sweltering in hell...). I ask you to correct this; otherwise I will publish this situation worldwide...**Fritz Fehling"**

Needless to say, fascistic-arrogant silence prevailed, and make no mistake**:** NZ's government signalled that it should not itself censor "misinformation", double-speak for welcoming and protecting such censorship – On 29/12/21 its TVNZ showed in the main evening news the cover of this Uncensored magazine with the message that shops should not sell it. If this had been done to fascistic mates/big-business, a libel case with big-money out-of-court settlement would result, so that until today there exists no reliable royal-court libel-precedence judgement, thus deliberately enabling eg. such book-burning. It is also the NZ govt that censors/disables truth-revealing covid videos on local library computers run by its National Library under its Department of Internal Affairs, where you can also "find" its spy agency that repeatedly arrogantly interfered/accessed Google Mail (can someone tell these shitsniffing morons that I use it to let them know?)...

This "local"-govt book-burning fascism could prevail, because the monarch's govts and courts refused to replace the anti-democratic local-govt (First-Past-the-Post-minority/relative-majority (s)election method, where even non-resident multiple-property owners incl. corporations can vote!) — I declared bankrupt when NZ's courts (incl. Supreme Court) tried to punish me for presenting a law-correct case under the Bill of Rights and Local Electoral Act*) to change this unlawful method. Instead this fascistic mayor can officially enact above censorship, despite having committed multiple bankruptcies that would have required several lifetimes if produced in series… He also told people that I am dead – has he not found the right executioner? *)Links for this article in "Letter to Governor-General.pdf"**:**

This all is in effect done in the name of the monarch who naturally prevents constitutionally safeguarded democracy, while bestowing the blasphemic royal title "His Worship" to mayors — the monarch was photographed in her childhood practising the Heil-Hitler salute, a fact not yet commonly known in the British Empire where the victor generally wrote the history… See https://www.spiegel.de/panorama/leute/queen-elisabeth-zeigt-hitlergruss-skandal-video-von-royals-in-sun-a-1044345.html.

NZ's Prime Minister Jacinda Ardern was a political trainée under freemason fascist Tony Blair — Intelligence test**:** which brotherhood groomed former P.M. and leader of the "other" party John Key (a NewYork stock-exchange-dealer jew, professional friend of China's dictator, and in favour of total surveillance and compulsory vaccination except the rich) for this job? His fascistic capitalism has done its job to concentrate wealth for the hereditary elite, now it's time for "her" National"socialism" to herd and cull the masses via vaccination and compulsory food additives, all under a monarchy that conditions the public to irrationally construe it as constitutional democracy (monarch and its fascism **is** the unwritten constitution)**;** Hence NZ"s high vaccination rate… Serfs need no privacy**:**

Such censorship indicates the final stages of modern Hitler-style rule with computer technology he could only dream of**;** NZ's Reserve Bank announced preparation for a digital currency – proud NZ wannabe the world's test case again, tripled with China-developed social demerit points together with total-surveillance satellite 5G-internet-of-things, to knip**/**censor regime critics in the bud, China-Russia-style. Elon Musk couldn't develop this all, he is only the unrestricted ego**c**entric rich-facilitator face like Gates, Zuckerberg, etc. to install this worldwide instead of obvious brotherhood, while setting an overpopulation example via 12 children that he wants to cull the public for. No point lamenting WW II soldiers on ANZAC day while allowing a creeping copy: **Fascism and its dictators can only dominate because you let them !** , and will lead to total destruction**/**extinction, because they are the main problem while preventing solutions. After all, it needs only extremely few of their victims believing in all-out revenge when all other venues become unrealistic. History's Method: Schizophrenic Victors Write It 7/11/2023

History mutated like this**:** Ancient tribal leaders excelled in some violent-problem solution, and were immortalised to hero gods, as Greek, German and most other cultures' legends tell**:** When they were battling / raiding other tribes (demons**/**multi-head dragons; English rugby origins), they told their own that **they were superior by birth** (origin of aristocratic class systems; they never had to achieve less to excel god-like), removing any conscientious barrier against organised oppression (slavery) and murder (war).

One hero combined all past gods into one omni-god who forbade worship of any other god, elevated his tribe to *God's chosen people*, and Moses to god's prophet (today: politician) in secret mountain-top sessions, all written down in the earliest history book called Old Testament for all to see. **[**The Bible starts with God's creation of planet Earth and then of animals and humans. The ***King***-James version (omitting compensation from justice due to monarchs' crimes…) starts with Genesis (begin, creation), subtly changing from "God" to "Lord God" **(**not paramount *king!)* so not to challenge the human king — while German bibles change to the more general "Herr" (ruler), and show the author **:** Moses, the dictator…**]**

Subsequent bully-boy dictators (incl. Hitler) told *their* chosen people that they will make their "America" first & great again, and aimed to achieve royal birth-right rule as precondition to god status, like earlier pharaohs, emperors and kings; French kings became god kings, and British monarchs replaced the pope as head of their Anglican church, much like islamic dictators.

However, totalitarian power is inherently violent and corrupts, causing victims even among family members**/**followers**/**subjects; Some of them rose as violent revolutionaries and then dictators themselves, falling into this same conditioning power trap in a vicious circle.

The most famous revolutionary saw the trick 2000 years ago (New Testament) and tried to make sheeple aware in order to break the traditional violent Moses circle and achieve peaceful civilisation in a more holistic way — too much for the Roman emperor, who made him be executed 'by the people' on-the-face-of-it, arrogant-metaphorically washing his hands in innocence, plenty of it…

600 years later the islamic hero-prophet Muhamad took-up elements of Moses' religion, now explicitly encouraging followers to slaughter inferior infidels, also as an antidote to such revolutionaries — although they consider Jesus as a prophet-like spirit, too — while the vicious circle spun**:**

Were the biblical 'racially superior' ***chosen people*** escaping from enslavement building the pyramids ("Exodus" to the promised land, no mention of its inhabitants…), where they became disliked by their (later islamic) neighbours very fast? Were they driven-out again ("Exile"), later emigrating around the known world, keeping to themselves while experiencing the same dislike, affecting social participation incl. employment? They consequently concentrated on money and jewellery (German 'Schmuck'**,** its Yiddish meaning is derogative), refining their financial abilities that produced wealthy rewards. Jealousy now added to this social dislike, god status more remote than ever. But behind the scenes a financial empire congregated, producing latent divide-and-rule war by making the hated Goyim (public cattle incl. Israel's quasi-compulsory-Covid-vaccinated public) fight each other in expensive wars that had to be financed by top jews. Over time these wanna-be hero gods had to realise that the method-justifying results based on deception **/** temptation **/** dishonesty cannot be a reflection of positive religious belief rather than malice**;** Conclusion**:** satan is God, and their fascistic brotherhood developed religious rituals to hide their character from lower members and the public in plain sight…

The dictator Hitler then turned ***all*** Jews into **scapegoats** (again, sheeple never had to do less to find a cause for their king/dictator-driven WW-I misery), which resulted in concentration (work) camps, WW-II, and Israel – I don't **mention Gaza**, do I? Nor the Rothschild jews' WEF "great reset" of the world to their ancient Moses kingdom, with Klaus Schwab's eternal hero face on every Big-Brother-AI screen (made in total-surveillance China) in your sweet homes**;** "You will own nothing and be happy", while they own all…

That's what dictator religions can do to you !

Historical analysis of the global elites ransacking the world economy until you'll own nothing TOP

Dictators' upbringing causes them to *enforce* the love for them that they never got. They developed schizophrenia, switching between positive (even common-good all-is-one) thinking and ego-god that can kill fellow humans like weeds, esp. when under dominance of memory-& restriction-removing drugs (incl. alcohol). Today some use the Matrix-movie's AI illusion as a tool to reduce sentient fellow beings to machine holograms to be commandeered or deleted at will, conditioning children via computer games…

Freemasons ritualised this into good-versus-evil dualism-simplicity to justify loss of control into malice. Fascists beware: You may believe that your gang can join the major brotherhood as a subsidiary, but for organised evil any honour/honesty to adhere to agreements does not exist – as NZ's appeal-court judge Cooke said in 1994**:** "***All that matters is Being in power and staying there***"... He got a Lord title... …soon after this definition of royal-legal "natural justice"...

The invention of a single-person god was an out-sourcing of believers' egos – imperfect (of course), because that of their dictator gods was exempt**;** An ***all-is-one*** **α & Ω** biblical **holistic philosophy** might be closer to reality, but keep dictators' egos at bay… and watch out for circular-logic traps, like**:** How many Jews did Hitler kill personally? and**:** Experiments on humans were legal**;** While others only followed orders. Hand-wringing Pilate under a waterfall of innocence again…

Pondering 2 questions**:** How much of history[?] was propaganda? Could there ever exist a **sane** human?
And the **12** human-enquiry problems/limitations in the introduction of philosopher **A.C. Grayling's book** " **The Frontiers of Knowledge -- What We Now Know about Science, History and the Mind** " **:**

Pinhole Problem. We see the universe and the past using very limited and highly circumscribed data available to us locally in space and time. Do our methods carry us through and beyond this pinhole?
Hammer Problem. Summed up pithily as 'If your only tool is a hammer, everything looks like a nail', this reminds us that we tend only to see what our methods and equipment are capable of revealing to us.
Lamplight Problem. We only look at a place where we can see; We enquire into what is accessible to enquiry, for the obvious reason that we cannot access what is inaccessible. [Light also a hammer tool?]
Metaphor Problem. What metaphors and analogies are invoked for explanations; Might they mislead?
Reading-in Problem. History and psychological-sciences data interpretations are often made according to assumptions local in time and experience to the investigators. Might propaganda influence enquiry too?
Criteria Problem. What are the justifications and correctives for the application of criteria such as 'simplicity', 'optimality', even 'beauty', 'elegance' [or 'culture'], in the formulation of research programmes and approval of results? Do appeals to these 'extra-theoretical criteria' help or distort enquiry?
Map Problem. Relation between theories and the realities, analogous to a map and the real country.
Ptolemy Problem. Ptolemy's geocentric model of the universe 'worked' in a number of ways, permitting the successful navigation of the oceans and prediction of eclipses, thus showing that a theory can be efficacious while still being incorrect. How to avoid being misled by pragmatic adequacy?
Parmenides Problem. *Reductionism*, reducing everything to a single ultimate causal explanation, which looks like the worst kind of elementary mistake, but which, remarkably, is a character of hard science.
Meddler Problem. Observing can affect what is being investigated or observed. When one studies animals in the wild, is one studying behaviour influenced by their being observed? This is known as the 'Observer Effect'. Can the disruption caused by preparing a specimen for microscopic examination be reliably excluded? Can smashing subatomic particles reliably reveal how they formed in the first place?
Truth Problem. Empirical enquiry gives us defeasible probabilities; What are the standards (such as the sigma scale in science) that can be regarded as satisfactory short of certainty? Does this imply that we have to treat the concept of truth pragmatically, as a (possibly unattainable) goal of enquiry upon which, in the ideal, enquiry strategically converges? Where does this leave the concept of 'truth' itself?
Closure Problem. Natural human desire to reach a conclusion, to have a completed explanation or story, to tidy up and sign off**;** A shortcut termination of the explanatory chain, shifting the task onto the listener…
